## NOTES

- Community Rubbe Tile is not recommended for commercial kitchens.
- Community Rubbe Tile is not recommended for heavy industrial areas.
- All furniture must have proper floor protectors - Casters must be clean and operate properly (flat, minimum 1" width casters for hospital beds).
- Community Rubbe Tile is not recommended for exterior use or where spiked golf or track shoes are present.
- Community Rubbe Tile is generally not suitable as wall covering or wall surfacing.
- Community Rubbe Tile is generally not recommended for applications such as hyperbaric rooms, computer rooms, electronic manufacturing or test labs where control of static is critical.

a. No Standing Water.      b. Non staining entryway walk-off systems
